גוטע AI טולס און וועבסייטס *בלויז טולס*

דורך ערב ראש חדש « דינסטאג יאנואר 13, 2026 12:08 am

בס"ד

אזוי ווי עס איז דא א לאנגע אשכול פאר גוטע AI טולס און וועבסייטס, וועלן מיר ברענגען א רשימה בקיצור פון אלע טולס און וועבסייטס וואס ווערן דארט אויסגערעכענט קרעדיט ווערט געגעבן פאר אלע גרויסע וויסענשאפטלער, כל אחד בשמו הטוב יבורך פון די עי איי אשכול ובראשם הרב @שדכן גדול

Main general tools

<https://chatgpt.com> - **ChatGPT** - commonly used - all in one tool for writing, images, coding, research

<https://claude.ai> / <https://www.anthropic.com/claude/opus> - **Claude (Anthropic)** - Long-context, careful reasoning. Claude is strong at long-form reasoning and handling big documents, and the Opus tier is particularly good for complex coding and analysis.

Gemini - Multimodal for writing, images, coding. most advanced and recommended free tool for all various tasks like reading hand written docs, image/video generation (better with Pro than Flash). Highly recommended for Yiddish writing

Assistant: <https://gemini.google.com>

Studio: <https://aistudio.google.com>

Storyboard / books: <https://gemini.google.com/gem/storybook>

<https://www.perplexity.ai> - **Perplexity** - AI answer engine and chat assistant with powerful Pro Search, reliable source links, strong coding help, generous daily limits (especially on paid plans), its own Comet AI browser, and desktop/mobile apps plus browser extensions available from the Platforms/Download pages.

<https://deepseek.com> - **DeepSeek** - Strong reasoning / coding, DeepSeek is a Chinese general assistant ai chat with a focus on strong reasoning and developer-friendly behavior, useful for algorithmic

questions, code explanations, and technical writing.

<https://grok.com> __ - **Grok** - Real-time-style assistant, Grok is a general assistant designed for more informal, real-time-style answers and browsing-type use cases.

<https://poe.com> __ - **Poe** - Multi-bot chat hub, Poe lets you access many different models and custom bots in a single interface, making it easy to compare answers or route different tasks to different bots.

<https://writingmate.ai> __ - **WritingMate** - In-browser writing helper, WritingMate sits in the browser to help with emails, website forms, docs, and general writing anywhere you have a text box.

<https://getmerlin.in> __ - **Merlin** - Desktop / browser overlay, Merlin brings AI help into any website or app via a shortcut overlay, good for quick rewriting, summarizing, and answering context-aware questions.

<https://openrouter.ai> __ - **OpenRouter** - Multi-model backend, OpenRouter provides a single API and UI for many different language models, useful if you want to experiment with model quality, speed, and price without re-wiring your app each time.

<https://nomic.ai/gpt4all> __ - **GPT4All / Nomic** - Local LLMs, GPT4All lets you download and run smaller language models locally on your own computer, so you can experiment without sending data to a remote server.

Coding - Full project builders

<https://lovable.dev> __ - **Lovable** - Full project developer, Generates apps from natural-language specs.

<https://base44.com> __ - **Base44** - Full project builder,

<https://www.netlify.com> __ - **Netlify** - Hosting/build platform, listed as a full project developer.

<https://studio.firebase.google.com> __ - **Firestore Studio** - Dev tooling, Dev tooling with AI for backend/app logic.

<https://medo.dev> __ and <https://medi.dev> __ - **Medo / Medi** - Full project builders, Full project builders.

<https://appgen.groqlabs.com> __ - **AppGen** - App generator from prompts.

<https://app.emergent.sh> __ - **Emergent** - Full project developer

<https://v0.dev> __ - **v0.dev** - Generates web & app UIs (React/Tailwind) from prompts.

<https://bolt.new> __ - **Bolt** - Web & app dev from prompts.

Code writers & editors

<https://www.anthropic.com/claude/opus> __ - **Claude for code** - Code from Claude.

<https://openai.com/codex/> __ - **OpenAI Codex** - Code from ChatGPT/Codex.

<https://sourcegraph.com> __ - **Sourcegraph** - Code search + AI, Code search + AI assistant on large repos.

<https://github.com/copilot> __ - **GitHub Copilot** - Code suggestions in editor.

<https://replit.com> __ - **Replit** - Online IDE, Online IDE with AI to "build full softwares".

<https://cursor.com> __ - **Cursor** - AI-first code editor AI-first code editor (referenced an iVelt guide on using it).

<https://windsurf.com> __ - **Windsurf** - AI code editor AI code editor for chatting with your repo.

<https://warp> __ - **Warp** - AI-powered terminal, Developer terminal with AI commands.

<https://antigravity.google> __ - **Antigravity** (Google) - Experimental AI/code playground.

Agents

<https://copilot.microsoft.com/labs/experiments/copilot-actions> __ - **Microsoft Copilot Actions** -

Agent-style actions over other tools.

<https://antigravity.google> __ - **Antigravity** (agent) - Also flagged as "Agent" on ivelt.

<https://manus.im/> __ - **Manus** - Advanced AI agent

Kosher, heimish, and Yiddish tools

<https://yiddishlabs.com> __ - **YiddishLabs** - Yiddish & Torah, Big variety of Tools around Yiddish and Torah writing.

<https://koshergpt.org> __ - **KosherGPT** - Kosher general assistant, Filtered general assistant intended for kosher use cases and a more guarded experience.

<https://safetmind.com> __ - **SafetMind** - Guard-railed assistant, Kosher-style assistant with stronger safeguards and filters.

<https://pointflow.ai> __ - **Pointflow** - Kosher prompts / guidance, Guard-railed assistant noted as "good for prompts" in focusing on guided and safe prompting.

<https://binaplus.co.il> __ - **BinaPlus** - Kosher AI, aimed at frum users, suitable for safer, community-aligned use.

<https://rav.dicta.org.il> __ - **Rav Dicta** - הלכה texts, Search and analysis tool for halachic texts and related Torah sources.

Yiddish translators and typing

<https://halavlur.github.io/Yiddish-translate/> __ - **Halavlur Yiddish translator** - English to Yiddish.

<https://elmosk.github.io/Yiddish-Translator/> __ - **Elmosk Yiddish Translator** - English to Yiddish with a different style/model.

<https://www.stars21.com/translator/english/yiddish/> __ - **Stars21 English -Yiddish** - Simple phrase translation.

<https://sofer.ai> __ - **Sofer.ai** - Helps type Yiddish/Hebrew correctly like a "sofer".

<https://chatgpt.com/g/g-68bf6f4dd0408191aff6ca90efd1f2b3-gematria-match-finder-spr-hgmtryvt> __ -

Gematria Match Finder - Custom GPT for gematria matching and text connections.

Graphics, image, and design tools

<https://dzine.ai> __ - **Dzine** - All-in-one AI design

Dzine (formerly Styler) is a controllable AI design suite for text-to-image, image-to-image, generative fill, background removal, logo/text effects, image mixing, and even 2D-3D-style transformations. It is good for:

- Turning sketches or portraits into styled art and cartoons.
- Editing existing images (add/remove objects, replace backgrounds, upscale).
- Designing logos, text textures, and marketing graphics in one canvas flow.

<https://krea.ai> __ - **Krea** - Real-time images / product shots, Krea generates and edits images in real time with many presets, it's especially handy for clean product shots and design-friendly visuals.

<https://midjourney.com> __ - **Midjourney** - Artistic images, High-quality artistic and stylized image generation, often used for thumbnails, concept art, and branding visuals.

<https://flux1.ai> __ - **Flux1** - Modern image model, Image generator for realistic and stylized images using the Flux models.

<https://labs.google/fx/tools/image-fx> __ - **Google Image FX** - Experimental Google tool for generating and editing images with text prompts.

<https://nanobananaai.com> __ - **NanoBanana AI** - Frontend for NanoBanana models with creative image styles.

<https://seed.bytedance.com/en/> __ - or <https://seedream.pro> __ - **Seedream** (Bytedance) - Image generation tools for high-quality visual outputs.

<https://playground.bfl.ai> __ - **Playground BFL** - Image playground for trying different models and prompts.

<https://makesense.ai> __ - **MakeSense** - Free labeling / OCR helper, Free web-based image annotation tool, recommended for labeling/OCR-style tasks.

<https://topazlabs.com> __ - **Topaz Labs** - Enhancement AI tools for upscaling, denoising, and sharpening photos and videos.

<https://lmarena.ai> __ - **LMarena** - Model arena / enhancement, Used both as a model comparison arena and noted as "good to improve old time images".

<https://yupp.ai> __ - **Yupp** - Old photo improvement, Designed to enhance and restore old photos.

<https://aidemos.meta.com/segment-anything/gallery> __ - **Meta Segment Anything** - 3D demos Gallery for segmentation and 3D-style experiments from images.

<https://renderstuff.com/tools/360-panorama-web-viewer/> __ - **360-view viewer** - Viewer for 360 panorama images in the browser.

UI and Marketing Design

<https://stitch.withgoogle.com/> __ - **Stitch** - UI design and layout ideas.

<https://labs.google.com/pomelli/about> __ - **Pomelli** - Marketing creatives (ads, social designs).

<https://genspark.ai> __ - **Genspark** - Brochures from text.

<https://manus.im> __ - **Manus** - Agent that can create brochures from text.

Video, audio, TTS, and music

<https://runwayml.com> __ - **Runway** - Prompt-based video editing and generation, Runway lets you generate and edit video clips using prompts, including image-to-video, background replacement, and effects.

<https://invideo.io> __ - **InVideo** - Template video creator, Online video editor with templates for social clips, YouTube, and ads, now with AI scripting features.

<https://wan.video> __ / <https://openwanai.com> __ - **Wan / OpenWan** - Video models, Tools and models for video generation using Wan.

<https://labs.google/fx/tools/flow> __ - **Google Flow (video)** - Experimental Google tool for generating/stylizing video.

<https://hailuoai.video> __ - **Hailuo AI Video** - AI video generation from prompts.

<https://animaker.com> __ - **Animaker** - Explainer videos, Template-driven video maker for explainer, ads, and social posts.

<https://fal.ai/models/fal-ai/klimg-video/v2.1/standard/image-to-video> __ - **Kling via fal.ai** - Image to video, Model that turns still images into short video clips.

<https://notebooklm.google.com> __ - **NotebookLM** - Podcast-style summaries, Takes your docs and sources and generates structured notes and podcast-style audio summaries.

<https://cleanvoice.ai> __ - **Cleanvoice** - Audio cleanup, Removes filler words, background noise, and mistakes from recordings.

<https://zeyuet.github.io/AudioX/> __ - **AudioX** - Audio creator Experimental audio creation/transform tool.

TTS and voices

<https://wellsaid.io> __ - **WellSaid** - Studio-quality TTS for training, explainer, corporate content.

<https://ttsopenai.com> __ - **TTS OpenAI** - Web/API for OpenAI's TTS voices.

<https://github.com/REYD-TTS> __ - **REYD-TTS** - Open-source TTS resources.

<https://tryparrotai.com> __ - **Parrot** - TTS/voice for agents and phone-style use.

<https://fish.audio> __ - **fish.audio** - TTS and voice cloning.

<https://fakeyou.com> __ - **FakeYou** - Fun/community TTS voices.

<https://elevenlabs.io> __ - **ElevenLabs** - High-quality TTS and custom voices.

<https://ttsmp3.com> __ - **TTSMP3** - Simple text-to-MP3 website.

<https://lingojam.com/FemaletoMaleVoiceChanger> __ - **LingoJam Female to Male Voice Changer** - Simple browser pitch/voice changer.

Music & sheet-music

<https://suno.com> __ - **Suno** - "Put in your song and get music" full song generation from prompts.

<https://moises.ai> __ - **Moises** - Splits stems and helps with practice.

<https://playscore.co> __ - **PlayScore** - Reads sheet music from images and plays it back.

Business tools

<https://aicreditcardnavigator.com> __ - **AI Credit Card Navigator** - Finance & business, helps compare credit cards.

<https://marketzifern.com> __ - **Marketzifern** - Heimish finance site.

<https://myuser.com> __ - **MyUser** - Sales B2B assistant.

<https://langcart.com> __ - **Langcart** - Order system.

<https://stor.ai> __ - **Stor.ai** - Grocery system.

Education tools

<https://edcafe.ai> __ - **Edcafe** - Teachers' assistant for lesson planning.

<https://tutorial.ai> __ - **Tutorial.ai** - Personalized tutorials.

<https://arcade.software> __ - **Arcade** - Interactive walkthroughs/tutorials, Interactive

walkthroughs/tutorials.

<https://notebooklm.google> __ **NotebookLM** - also serves as a learning/podcast tool (listed above).

Health tool

<https://doctronic.ai> __ - **Doctronic** - Health doctor assistant, Health doctor assistant for documentation/decision support (not a replacement for a doctor).

Construction tool

<https://stackct.com> __ - **StackCT** - Construction blueprint helper.

Vision & browser voice

<https://www.microsoft.com/en-us/edge/copilot/vision> __ - **Edge Copilot Vision** - Image/vision features inside Edge.

<https://chromewebstore.google.com/detail/voice-to-text-whisper-+-a/ofcnobbcnfgchjfpembldomkdldepfm> __

- **Whisper+Chrome** - Voice-to-Text Chrome extension, works very fast, catches speech well, and has a "Polish" feature to turn rough speech into polished emails, working across almost any text box.

Resource & community links

<https://huggingface.co> __ - **Hugging Face** - Models, datasets, Spaces, and tooling.

<https://aixploria.com/en/ultimate-list-ai> __ - **Aixploria AI list** - Large directory of AI tools.

<https://2net.co.il/ai.html> __ - **2Net AI library** - Library of AI links in Hebrew/Yiddish context.

<https://platform.parallel.ai/home> __ - **Parallel AI platform** - Deep research
